

AARYAN NILESH KATHOLE

Boston | Massachusetts | 02119 | +1 (857) 351-0598
kathole.a@northeastern.edu | linkedin.com/in/aaryan-kathole-9433a0398
Available: May 2026 onwards for Co-op/Internship

EDUCATION

Northeastern University, Boston, MA

Khoury College of Computer Sciences

Candidate for a Master of Science in Computer Science

Related courses: Programming Design Paradigms, Database Management Systems

Sept. 2025 – Present

Expected graduation: May 2027

Ramrao Adik Institute of Technology (Dr. D.Y. Patil University), Mumbai, India

Bachelor of Technology in Computer Engineering, **GPA: 8.79/10.0**

Related courses: Data Structures, Machine Learning, Database Management Systems, NLP, Cloud Computing

June 2025

TECHNICAL KNOWLEDGE

Languages: Python, Java, SQL

Databases: MongoDB, MySQL

Web Technologies: HTML, CSS, Streamlit, Flask, Node.js

Tools & Frameworks: Unity, AR Foundation, Git, AWS, Excel, Power BI

Certifications: AWS Academy Graduate, Walmart Advanced Software Engineering Job Simulation, JP Morgan SWE Simulation, Complete Python Bootcamp, Clean Code, Ultimate MySQL Bootcamp

WORK EXPERIENCE

Fab Tech Engineers, Maharashtra, India

Data Analyst Intern

Feb 2024 – Aug 2024

- Analyzed complex datasets and generated actionable insights using Python and SQL, supporting data-driven decision-making for business compliance requirements.
- Implemented data cleaning and transformation pipelines, removing duplicates and handling missing values to ensure data integrity across 10,000+ records.
- Developed interactive dashboards and visualizations using Power BI and Excel, improving data accessibility for stakeholders.
- Collaborated with cross-functional teams to understand data lifecycle in business operations.

PROJECTS

Decormate AR: Multi-Object Interior Visualization App

Aug 2024 – Nov 2024

- Developed AR-powered app using Unity and AR Foundation enabling real-time placement of multiple 3D furniture models.
- Achieved copyright approval from Government of India for innovative multi-object visualization approach.
- Implemented scalable framework supporting smooth performance with 60+ FPS for enhanced user experience.

Respiratory Disease Detection and Classification Using Deep Learning

Feb 2025 – Apr 2025

- Developed CNN-based system using ResNet architecture for automatic detection of respiratory diseases from chest X-rays, achieving robust performance across pneumonia, tuberculosis, and COVID-19 diagnosis.
- Implemented comprehensive data pipeline with preprocessing, augmentation, and validation techniques to ensure model generalization across diverse medical imaging datasets.
- Achieved high accuracy, precision, recall, and F1-score metrics demonstrating system reliability as clinical decision-aid tool for resource-constrained healthcare environments.

INTERESTS/ACTIVITIES

- Published research paper "Respiratory Disease Detection and Classification using Deep Learning" at MULTINOVA ICAIEHS-2025 International Conference (DOI: 10.2991/978-94-6463-852-3. 19).
- Received Copyright Registration (SW-20059/2025) from Government of India for "Decormate AR" innovative AR furniture app.
- Volunteered for Cancer Detection Camp and Blood Donation drive with Rotary Club of Shahapur Central (2023-2024).
- Led team 'Dungeon Showdown' at IEEE-RAIT WHIZION Techfest 2023.
- Demonstrated Voice Controlled Bot and Panic Braking System projects for NAAC peer team visit (2022).
